SMES VOLUNTARY SUSTAINABILITY REPORTING:

EFRAG Exposure Draft and Data Demands from Financial Sector and Large Undertakings

 Friday 10 May 2024
9:30 -13:00 CEST

 Hybrid event
(Luiss Campus at Viale Romania 32, Rome)

OIC, EFRAG, Assonime and Luiss University organise a joint event on 10 May 2024 on sustainability reporting of non-listed SMEs.

EFRAG has developed the Exposure Draft of voluntary sustainability standard for non-listed small- and medium sized enterprises (VSME), so that they have a simple standard for reporting on ESG issues. In addition to the objective to improve the management of the sustainability issues SMEs face, by this initiative EFRAG aims to eliminate difficulties that SMEs encounter to satisfy data demand both from lenders/credit providers and investors and large undertakings of whose value chain they are part.

In this context, OIC, EFRAG, Assonime and Luiss University are organising an outreach event and invite all interested parties to participate.

The event will include the participation of representatives of National Authorities. Italian stakeholders will provide their preliminary views on the core aspects of the Exposure Draft.

The event, free of charge, will be in Italian and may be followed also in streaming. The programme and the registration details will be issued in due course.
